

How Much to Buy and Cook?

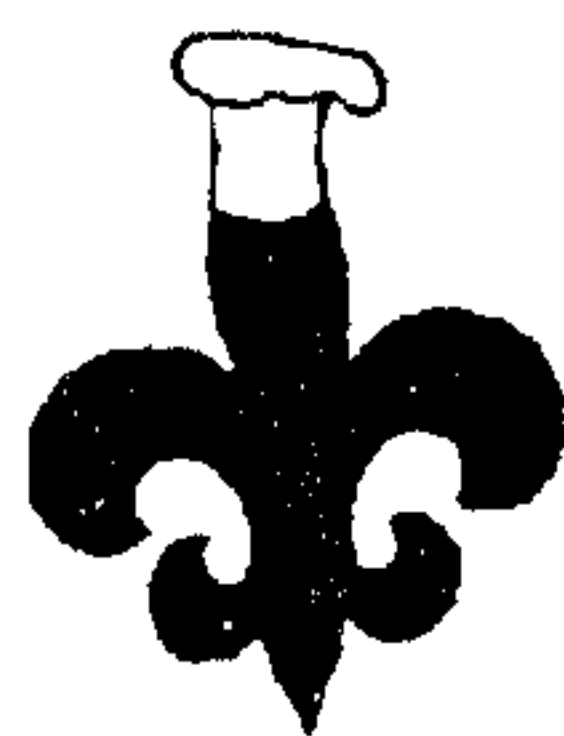

The APL will be given a count of how many people from their patrol will be attending the outing. This will determine how much to buy. The amount budgeted for each person for the entire weekend will determine how much can be spent for the patrol. The grubmaster will give you this money prior to the outing. You are encouraged to shop the sales, use coupons, buy generics, and use our tax-exempt status. You are expected to give the grubmaster your receipts and any change after you have shopped.

Nutrition Labels- These labels include the number of servings in a package. This is extremely useful to figure out how much to buy. For example, they indicate how many cookies are in a package, how many slices of bread are in a loaf, and how many slices of bacon are in a package.

Salad Bar- A salad bar is available at most larger grocery stores. This provides an economical way to buy small quantities of fresh chopped vegetables such as lettuce, peppers, celery and onions.

Tax Exempt Letter

The state of Illinois extends exemptions from its sales tax to all scout councils and chartered units and in a revised procedure provides a single tax exempt number for claiming that exemption. The sales tax exemption number is E9982-8707-04. The previously required sales tax exemption letter is no longer required.

Camp Menu Planner
